

ENSO

The ENSO presents BitFenix simple beauty PC concept with the latest AURA SYNC 3 pin addressable RGB LED technology and tempered glass without compromise to thermal and silence performance. The core of the ENSO is its clean design, well balanced between a perfectly organized interior structure and the sleek exterior design. It is complemented by a tempered glass side panel and the latest in RGB illumination effects, highlighting the clean and discreet lines of the metallic front panel.

Metallic Front Panel

Sleek Design With Metallic Front Panel

The clean design concept is well balanced between a perfectly organized interior structure and a sleek exterior design. It is complemented by a 4mm see-through-tinted tempered glass panel on the side and addressable RGB illumination surrounding the metallic front.

Enhanced Addressable RGB Illumination

The BitFenix ENSO premieres BitFenix' new RGB illumination. The addressable RGB lighting allows multiple LED colors in one zone instead of one static color at a time.

It is powered by a built in controller (compatible to both, BitFenix Alchemy 2.0, static, and BitFenix 3.0, addressable, RGB products) offering single colors to match different system builds, but also featuring different rainbow modes.

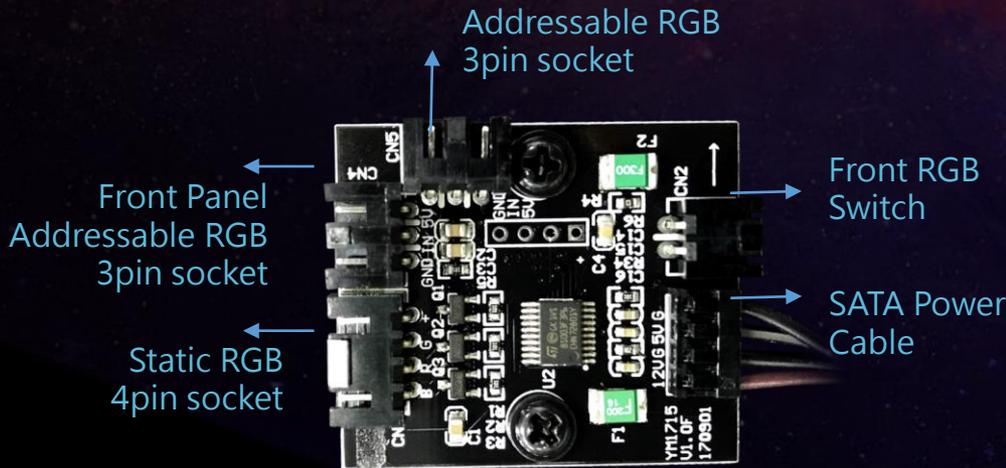

AURA SYNC 3 Pin Addressable RGB Technology

The RGB illumination of the ENSO supports the latest ASUS AURA Sync 3 pin addressable RGB motherboards, currently found in high-end segment. It enables users to coordinate multiple color lighting on different devices, including the all new Alchemy 3.0 addressable RGB strip, all controlled and synchronized by the ASUS AURA software bundled with Asus AURA SYNC 3 pin motherboards

See-through-tinted 4mm Tempered Glass Side Panel

The ENSO comes with a high-quality tempered glass side panel with a strength of 4mm. The tempered glass panel is see-through-tinted, allowing a peek into the case showing off the now often RGB illuminated main components.

Clean Interior With 23mm Cable Management Space Behind Motherboard Tray

The ENSO comes with a PSU shroud hiding the PSU and up to two HDDs beneath it, while three SSDs can be attached to the back of the motherboard tray, showing only the motherboard, graphics cards and the cooling solution through the tempered glass panel. The 23mm cable management space behind motherboard tray makes it an easy job to manage the cables clean. With the drive-trays out of the way, the ENSO provides plenty of space for graphics cards with a length up to 340mm.

Thermal Capability

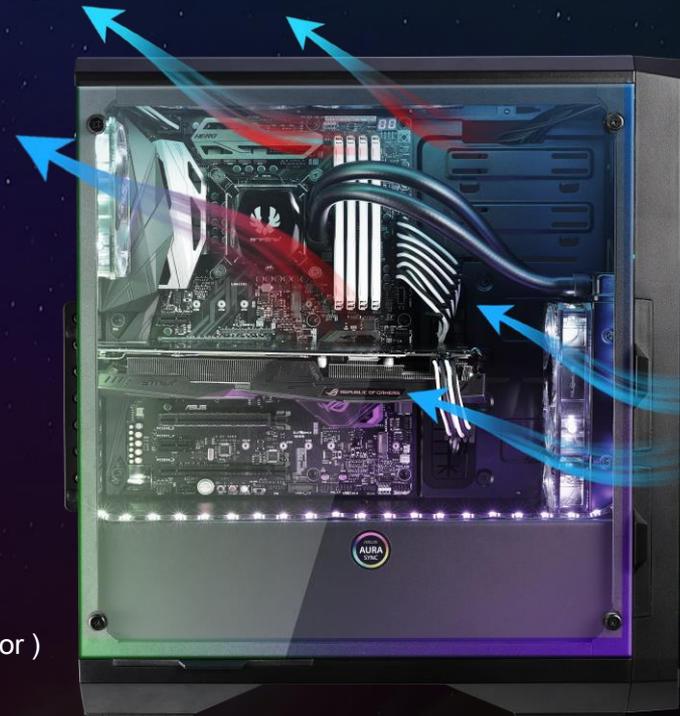

To cool down the components, hidden air-vents are placed around the metal cover on the front panel to enhance smooth intake. ENSO supports up to two 140mm fans or a 280mm radiator in the front while a 120mm rear-fan or radiator at the rear and up to two 120mm fans in the top will push the hot air out. ENSO also supports up to 160mm high CPU air cooler.

Silence Engineering

Enso doesn't compromise the comfort of silence level. The clean interior design creates no interference to the air flow blowing straight on GPU that helps not only to cool down the GPU also reduces the noise level of the air flow. The close and clean PSU shroud keeps the HDD silent beneath it. And the soft foams complemented with tempered glass lock the noise inside. Bundled with both mesh and solid top cover offers the flexibility to either air flow or silence preferred options

Easy Clean With Side-way Removable Dust Filters

To keep the interior of the ENSO dust-free, multiple filters are placed around the case. The top filter is attached via magnets and can be easily slid off to clean it.

The ENSO also features BitFenix' new sideway-removable filters in the front and the bottom, thus enabling users to remove the front and PSU filter easily without lifting or moving the case.

Material		Steel, Plastic, Tempered Glass
Motherboard Support		Mini-ITX, MicroATX, ATX, E-ATX up to 272mm
Maximum GPU Length		340mm
Maximum CPU Cooler Height		160mm
Expansion Slots (PCI-E)		7
Front I/O Ports		2 x USB 3.0, 1 x HD Audio/Mic
Drive Bays	3.5"	2 (Usable as 2.5" bay)
	2.5"	3
Fan Support	Front	2 x 140mm or 2 x 120mm
	Top	2 x 120mm
	Rear	1x 120mm
Included Fans	Front	1 x 120mm Fan (Black)
	Rear	1 x 120mm Fan (Static RGB)
Radiator Support	Front	1 x 240mm or 280mm (35mm thickness)
	Rear	1 x 120mm
Power Supply		ATX & Standard / up to 160mm
Dimensions (W x H x D)		210mm x 489mm x 454mm
Weight		7kg
