

# Alchemy 2.0

# Alchemy 2.0

The Bitfenix Alchemy 2.0 kit is a pre-sleeved cable kit that supports a wide variety of modular power supplies from different manufacturers. These premium cables feature precision molded connectors and come in a variety of colors and cable types, enabling modders to transform normal PCs into objects of wonderment.

# Alchemy 2.0 – Performance

Aimed at high performance power supplies, Alchemy 2.0 is manufactured with high quality components to support upto 1600W. Use of High Current Alloy Terminals improves the connection and minimizes the efficiency drop in modular cables. Use of Pure Copper cables with thicknesses up to 16AWG reduces the resistance while increasing the efficiency.

# Alchemy 2.0 - Sleeve

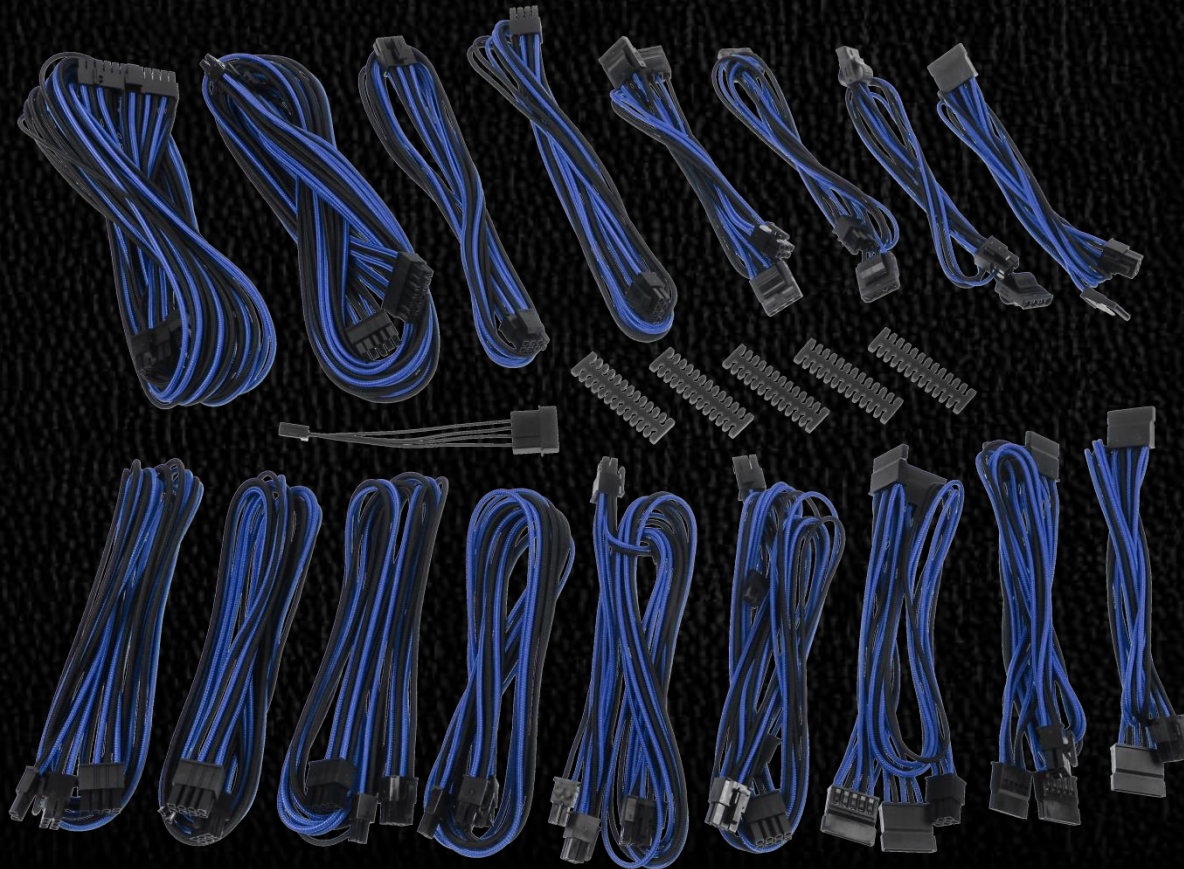

Alchemy 2.0 cables are sleeved to perfection with high density sleeving in a heatshrink-less sleeving process. Using special cables, the flexibility has been improved to extend the durability of the cables.

# Alchemy 2.0 - Compatibility

Alchemy 2.0 sleeved cables are designed to replace the standard modular cables of the modular power supplies from the major brands. Each kit contains a set of standard modular cables for the specific power supply and five rubber cable combs to improve aesthetics of the build.
